

Tigist Ashenafi

Addis Ababa, Ethiopia | +251 98 325 0692 | tigistashenafi42@gmail.com

Professional summary

I'm passionate about coding and enjoy learning new things to improve my skills, solve problems & create innovative software solutions. I work hard to stay updated with the latest technologies & trends in the tech world. Being friendly and sociable, I enjoy collaborating with others, sharing ideas & working as a team with others to make projects more effective & enjoyable. My curiosity & motivation drive me to develop software that helps people & makes a meaningful difference.

Work experience

Full-stack developer intern

Ras innovate | Addis Ababa

November 2025 to Present

- Contributed to the development of a Two-Player Card Game, an interactive web application featuring turn-based gameplay and player interactions.
- Collaborated with the development team to design, develop, test, and improve features for the game.
- Worked on frontend and backend functionality, including API integration and application logic.
- Debugged issues and contributed to improving the performance, functionality, and maintainability of the project.

Software Developer Intern

eTech S.C | Addis Ababa

April 2025 to September 2025

- Contributed to ERP system development and quality assurance, supporting the delivery of reliable and effective software solutions.
- Collaborated with the development team to test, improve, and enhance system functionalities, contributing to project quality and performance.
- Demonstrated strong technical skills, problem-solving abilities, innovation, professionalism, and teamwork while contributing to project success.

Full Stack Developer Intern

Tewos Technology | Addis Ababa

July 2024 to September 2024

During my internship at Tewos Technology, I contributed to multiple software projects as part of the development team:

- Etbolo - Contributed to the improvement of the application features while collaborating with the team.
- Yene Mekina - Assisted in enhancing system functionalities to support the project's requirements.
- Yene Delivery - Contributed to improving features for the delivery platform and its overall functionality.
- ERP System - Contributed to implementing and improving features to support project requirements while collaborating with the development team.

Education

Software Engineering (University)

Debre Berhan University | Debre Berhan

April 2021 to June 2026

Skills

Supabase

Back-end development

Next.js

Node.js

Laravel

Application development

Python

Git

JavaScript

TypeScript

Express.js

MySQL

Full-stack development

Certifications and licenses

Certificate of Appreciation

September 2025 to Present

- Recognized for successfully completing an internship in the Software Delivery Department, contributing to ERP development and quality assurance. Demonstrated strong technical skills, innovation, professionalism, teamwork, and dedication while contributing to project success and organizational goals.

Artificial Intelligence Fundamentals

May 2025 to Present

Certificate awarded for successful online course completion.

Programming Fundamental

September 2024 to Present

- Certificate awarded for online course completion.

Certificate of Completion

September 2024 to Present

- Completed a professional internship contributing to multiple projects. Demonstrated strong technical skills, teamwork, adaptability, and a positive attitude while working on real-world software projects.

Additional information

I have developed the following projects to strengthen my practical experience in full-stack and mobile application development. These projects demonstrate my ability to design, develop, and integrate functional software solutions while applying modern technologies, problem-solving skills, and software engineering practices.

- Project Management System

Built a full-stack project management application using Angular, Vert.x, and MySQL. Developed features including secure authentication, project and task management, team assignment, document management, and an admin dashboard to improve collaboration and workflow efficiency.

- ServeEase – Digital Marketplace for Verified Professional Services

Developed a mobile application that connects service seekers with verified service providers. Implemented features for service discovery, booking requests, provider verification, and a user-friendly experience for accessing reliable professional services.

- Two-Player Card Game

Designed and developed an interactive two-player web-based card game with turn-based gameplay, player interactions, and game logic. Focused on creating a responsive, engaging, and intuitive user experience.
